Key words and phrases: quality; products; certification; standards; quality requirements.

Abstract: Matters concerning introduction of quality control systems at industrial enterprises are considered. According to the project of new version of ISO standards 9000-series edited in 2004, companies are due to create subsystems of quality expenditures account. The classification is based on the PAF (Prevention–Appraisal–Failure) model. In 1990 British standard BS 6143 was based on this approach.
