Key words and phrases: indeterminate future of education; society; present-day steady developing economy; steady development; ecological conflict

Abstract: The development of Russian education should provide its high degree of flexibility and adaptability. It's necessary to restore Russia as the country of the intellectuals. Creative work is encouraged by decent financing and high level of social recognition. It's required to train people to be innovative and form the conditions encouraging creativity. Restoration of creative environment will enable to draw young scientists' attention to research and form innovative type of mind.
