

Risks Control System and Electronic Declaring as New Standards of World Trade

M.M. Breeva

Russian Customs Academy, Tambov

Key words and phrases: the time of customs procedures; customs bodies activities; the problem of false declaring; risks control system; electronic declaring.

Abstract: For further integration of Russia into European customs space it is necessary to aim the customs bodies' activities at prospective methods of work, such as electronic declaring and risks control system, thus reducing the time of customs procedures and solving the problem of false declaring.
