Key words and phrases: environment protection; the European Union; natural management; environmental safety.

Abstract: The paper studies the basics of constitutional legislation of European Union and Communities in the area of environmental safety. The main sources of constitutional environmental laws of European countries are revealed; they form the basis of all-European policy of environmental safety. The key elements of the environmental safety policy implementation on the basis of documents of associations of three main European Communities (European Coal and Steel Committee, EU, EuroAtom) are determined.
