

## **Research and Analysis of Hygroscopic Properties of Amaranth Seeds**

**S.T. Antipov, A.V. Zhuravlev, I.M. Chernousov, E.S. Bunin**

*Voronezh State Technological Academy*

**Key words and phrases:** moisture content; isotherms; equilibrium moisture content; energy of moisture and material link.

**Abstract:** Experimental and theoretical data of equilibrium moisture of amaranth seeds are produced; they enable to calculate energy of the link between moisture and seeds on different moisture content parts, develop and substantiate an effective method of drying.
