Key words and phrases: fixed assets; sources of generation; account payable; loans and borrowings; operating assets; own and borrowed capital; financial stability.

Abstract: The paper identifies the sources of generation of operating assets of agricultural enterprises in Tambov region. The results of the carried out economic analysis have proved that the main source of generation of operating assets is liabilities comprising loans and borrowings. The analysis of the capital invested into the regional enterprises property shows that the borrowed capital is dominant in the sources of its generation. The analysis of the financial condition of the agricultural producers in Tambov region is conducted; it proves the decrease in their financial stability over the past years.
