**Key words and phrases:** economic maturity; exploitability; felling age; technical maturity.

**Abstract:** The paper finds out the exploitability of Ulyanovsk forestry in Ulyanovsk region (the produced date can be referred to the region as a whole, since the considered forestry presents both zones of the region: forest-steppe and coniferous broad-leaved forest). These are studied from silvicultural and economic views; their comparative evaluation with the previous data in the forestry is made.
