

## **Equilibrium in Economics**

**S.V. Nagorny**

*Tambov State Technical University, Tambov*

**Key words and phrases:** classical model of economic equilibrium; economic equilibrium; equilibrium model of self-developing market economy; general economic equilibrium; generalized periodical solution; Keynesian economics; monetarism; natural valuation of unemployment.

**Abstract:** From the mathematical point of view economic equilibrium is studied as generalized periodical process. Thus, the research into equilibrium in specific economic systems is possible through the technique of mathematical modeling.
