Key words and phrases: accentuation character; communicative training; communicative speech-game; communicative and speaking skills; differential psychology; intrapersonal mechanisms of self-correction; hyperthymic, hysteroid, schizoid types; personality; speech genre; verbal behavior.

Abstract: The paper discusses the problem of interdependence of person's verbal behavior and his character based on the analysis of sociability of adolescents with accentuation of character. That brings the author of the study to the conclusion that teenager's speech is determined by his individual features and enables by means of observation to diagnose the type of accentuation of his character. We propose a description of the main directions of work on the author's methodology oriented at the harmonization of personal development of adolescents with different types of character accentuations.
