*Chelyabinsk State Academy of Culture and Arts; Chelyabinsk Institute (Affiliate) of Ural Academy of State Service, Chelyabinsk*

**Key words and phrases:** method of forming general technical culture; rating system.

**Abstract:** At the present stage of development and modernization of higher education the process of implementation of the public educational standards of the new generation is under way. One of the components of these standards is the cultural component of future specialists. Since modern industrial production is based on the extensive use of scientific knowledge in production activities, the current focus is the development of methods of forming a general technical culture of the future professionals. The application of rating system in the framework of this technique enables to reveal their creative potential, enhance professional competence, team work, which is especially relevant in our time.
