

## **System Approach to Designing New Honey-Based Products**

**E.I. Muratova, E.V. Artamonova**

*Tambov State Technical University, Tambov*

**Key words and phrases:** honey pastes; functional purpose products; compoundings; IDEF0 standard; technological scheme; technical-chemical control; CASE-technology.

**Abstract:** The CASE-model of the process of creating new functional purpose honey-based products is developed. Its application for developing formulations of honey pastes, substantiation of methods of their production and technical-chemical control, preparation of technical documentation on a new kind of products is considered.
