Key words and phrases: adoption; children's rights; protection of rights; priority of family child-rearing.

Abstract: We consider some problems of children's rights in the adoption procedure in the Russian Federation, including the return of adopted children in the orphanage by adoptive parents, the creation of a tool to monitor the child's life in the adoptive family, improving the state policy of financial support to families with children, regardless of whether the children are adopted or related by blood.
