
The Influence of Modern Information Society Phenomena on Education

O.A. Danko

*Russian University of Economics named after G.V. Plekhanov,
Moscow*

Key words and phrases: communication; education; information; information society; model.

Abstract: The article considers the key phenomena of modern information society (in particular the phenomenon of “distributed consciousness”), which negatively influences the process of education. It is offered to develop learners’ information-model presentations, enabling to overcome the negative effects of these phenomena in the course of training.
