

## **The Device for Realization of the Reverse Current Mode with the Given Pulse Length**

**Yu.V. Litovka, A.S. Egorov**

*Tambov State Technical University, Tambov*

**Key words and phrases:** current reversing device; nickel electroplating; uniformity of galvanic coating.

**Abstract:** The new device enabling to apply electroplating in a current reverse mode at duration of direct and reverse currents from 1 ms without the need for replacement of available rectifier units by the reversible is developed.
