Tambov State Technical University, Tambov

Key words and phrases: base university; cluster approach; educational and scientific complex; regional economy.

Abstract: The paper focuses on the problems of regional universities positioning in socio-economics system of the Russian Federation on the example of the Tambov region. The model of base university of regional economy has been proposed. The concept of strategic development of the regional university and Russian multi-profile scientific and educational center for production, environmental and anthropogenic safety has been proposed on the example of HEI “Tambov State Technical University”. The expected effects of the strategy implementation in science, education, economy, social relations and defence strengthening of the county have been outlined.
