Keywords: innovation model; personnel potential of the regional economy; the quality of education; corporate project office; pedagogical innovations; network interaction in education.

Abstract: The paper presents the results of a study on the modeling of an innovative form of network interaction between a school and an enterprise in the format of a corporate project office. The developed model contributes to the strengthening of the professional orientation of general education and the creation of conditions for the conscious professional self-determination of students.

The results of the study can be used in the work of educational institutions in order to improve the quality of the educational process and the formation of a corporate meaningful educational environment.
